

How to Do Business with the U.S. Army Materiel Command

February 2014

INTRODUCTION

The U.S. Army Materiel Command (AMC) is decisively engaged in supporting the Army's transformation to an ever more responsive, deployable, agile, versatile, lethal, survivable, and sustainable force. AMC serves a crucial role in technological innovation, state of the art streamlined acquisition support, and seamless logistics from the laboratory to the foxhole to enable our 21st century Army to fight and win our nation's wars.

To accomplish this extremely complex mission, AMC relies on the industrial base to provide innovation and the best possible technology and support services for our warfighters. This defense industrial base is comprised of both large and small businesses, and higher education institutions, including historically black colleges and universities and minority institutions.

Each of the AMC major subordinate commands have Associate Directors of Small Business and Small Business Specialists who are committed to helping you explore opportunities to do business with their commands. These Specialists, whose contact information is in this pamphlet, are an excellent starting place for you to effectively market your organization's capabilities. There are literally thousands of business opportunities within the command and we encourage you to use the information in this pamphlet to seek opportunities to support AMC.

We invite you to join the Army Materiel Command team to help us achieve our vision of continuously improving support to our military men and women and leading the development of new technologies and sustainment process to transform the Army.

Provide superior technology, acquisition support and logistics to ensure dominant land force capability for Soldiers, the United States and our allies.

HQ U.S. ARMY MATERIEL COMMAND (HQ AMC)

AMC is the Army's premier provider of materiel readiness -- technology, acquisition support, materiel development, logistics power projection, and sustainment -- to the total force, across the spectrum of joint military operations. The command's complex missions range from development of sophisticated weapon systems and cutting-edge research, to maintenance and distribution of spare parts.

AMC operates research, development and engineering centers, laboratories, depots, arsenals, ammunition plants, and other facilities, and maintains the Army's prepositioned stocks, both on land and afloat. The command is also the DoD Executive Agent for the chemical weapons stockpile and for conventional ammunition.

The command is engaged in the development, support, and sustainment of the future Army while at the same time, supporting and sustaining the current Army. Through its maintenance depots, AMC restores weapon systems needed as the Army makes its way to full transformation. The command's overhaul and modernization efforts are enhancing and upgrading major weapon systems -- not just making them like new, but inserting technology to make them better.

AMC handles diverse missions that reach far beyond the Army. For example, AMC manages the multi-billion dollar business of selling Army equipment and services to friends and allies of the United States and negotiates and implements agreements for co-production of U.S. weapon systems by foreign nations. AMC also provides numerous acquisition and logistics services to the other components of the Department of Defense and many other government agencies.

AMC is headquartered at Huntsville, AL and is located in about 149 locations worldwide, including more than 45 states and 38 countries. AMC has about 50,000 dedicated employees at these organizations, both military and civilian, many with highly developed specialties in weapons development and logistics.

To develop, acquire, and maintain materiel for the Army, AMC works closely with industry, as well as colleges and universities, to ensure that state-of-the-art technology is effectively leveraged for the defense of the nation.

As the place in the Army where superior technology, acquisition support, and logistics are integrated to assure readiness for today and tomorrow, AMC is heavily involved in making the Army more responsive, deployable, agile, versatile, lethal, survivable, and sustainable.

*From beans to bullets, helmets to helicopters, spare parts to spare ribs,
AMC touches every soldier in the Army everyday*

GUIDE TO CONTRACTING OPPORTUNITIES "A Step-by-Step Approach"

1. Identify Your Product or Service

It is essential to know the Federal Supply Class or Service (FSC/SVC) codes and North American Industry Classification System (NAICS) codes for your products or services.

2. Register Your Business

- **Obtain a DUNS Number**

The Data Universal Number System (DUNS) Number is a unique nine character identification. If you do not have a DUNS Number, contact Dun and Bradstreet to obtain one.

http://www.whitehouse.gov/sites/default/files/omb/grants/duns_num_guide.pdf

- **Register with Central Contractor Registration (CCR)**

You must be registered in [Central Contractor Registration \(CCR\)](#) to be awarded a DoD contract. CCR is a database designed to hold information relevant to procurement and financial transactions. CCR affords you the opportunity for fast electronic payment of your invoices. "[Dynamic Small Business Search](#)" is an additional tool used by Contracting Officers and Contract Specialists to locate Small Business concerns.

3. Identify Your Target Market

Research [Personnel & Procurement Statistics](#). Of particular interest to small businesses is the Standard Tabulation (ST) 28 report of products and services purchased each fiscal year by the DoD. Data on the ST28 are sorted by FSC/SVC code and provide name and location of DoD contracting offices. This can be cross-referenced with the list of Small Business Specialists within each individual service organizations.

- [ARMY](#)
- [NAVY](#)
- [AIR FORCE](#)
- [DLA](#)
- Other Defense Agencies (ODAs) are included in a list of [DoD Small Business Office Sites](#) on this site.

4. Identify Current Procurement Opportunities

Identify current procurement opportunities in your product or service area by checking the electronic version of the [Federal Business Opportunities](#) website, which can assist you in identifying all Federal procurement opportunities. For the most up to date Army solicitations, visit the [Army Single Face to Industry website](#). Also visit the Small Business Innovation & Research Information website, <http://www.arl.army.mil/www/default.cfm?page=29>.

5. Familiarize Yourself with ARMY Contracting Procedures

Be familiar with [Federal Acquisition Regulations](#) (FAR) and the [Defense Federal Acquisition Regulation Supplement](#) (DFARS).

6. Investigate Federal Supply Schedule (FSS) Contracts

Many DoD purchases are, in fact, orders on Federal Supply Schedule (FSS) contracts. [Contact the General Services Administration](#) (GSA) for information on how to obtain a FSS contract.

7. Seek Additional Assistance as Needed

There are several important resources that are available to assist you in the ARMY marketplace:

- [Procurement Technical Assistance Centers](#) (PTACs) are located in most states and are partially funded by DoD to provide small business concerns with information on how to do business with the Department of Defense. They provide training and counseling on marketing, financial, and contracting issues at minimal or no cost.
- Small Business Specialists (SBS): The Military Services and some Defense Agencies have small business specialists at each of their procurement and contract management offices to assist small businesses, including veteran-owned, service-disabled veteran-owned, HUBZone, small disadvantaged, and woman-owned small business concerns in marketing their products and services to the DoD. Among other services, these specialists provide information and guidance on (1) defense procurement procedures, and (2) how to identify prime contract and subcontract opportunities. To learn more about the Army's Mission and before attempting to sell to your customers of interest, contact the SBS at <http://sellingtoarmy.com/user/showpage.aspx?SectionID=9>.

The Army, Navy, Air Force, and Defense Logistics Agency maintain the names of Small Business Specialists associated with their organizations. Links to these websites are below.

- [ARMY](#)
- [NAVY](#)
- [AIR FORCE](#)
- [DLA](#)
- Other Defense Agencies (ODAs) are included in a list of [DoD Small Business Office Sites](#) located on this site.

- [DefenseLink](http://www.defense.gov) (<http://www.defense.gov>) is the official web site for the Department of Defense and the starting point for finding U.S. military information online, including links to the Military Services and ODAs.
- Additional procurement-related resources are located in the Links section of our web site <http://www.amc.army.mil/pa/SMALLBUSINESS.asp>.

8. Explore Sub-contracting Opportunities

Regardless of your product or service it is important that you do not neglect our very large secondary market. Our guide "[Subcontracting Opportunities with DoD Prime Contractors](#)". This directory provides, by state, the names and addresses of DoD prime contractors, the names and telephone numbers of Small Business Liaison Officers (SBLOs), and the products and services supplied to the DoD. The report is generated from data mined through DoD Prime Contractor's contracts and subcontracting plans. Please note that the DoD OSBP does not maintain the data on this website. The directory reflects data as of September 30, 2005. We encourage you to investigate potential opportunities with these firms. Many also have websites that may be useful and we encourage you to explore teaming options. In addition, many of the larger organizations may have subcontracting opportunities at the lower tiers (beyond the first and second tiers).

The SBA's [SUB-Net](#) is another valuable resource for obtaining information on subcontracting opportunities. Solicitations or notices are posted by prime contractors as well as other government, commercial, and educational entities.

9. Investigate DoD Small-Business Programs

There are several programs that may be of interest to you such as: Veteran-Owned, Service-Disabled Veteran-Owned, HUBZone, Small Disadvantaged, Woman-Owned, Small Business Innovation Research, Small Business Technology Transfer, Mentor-Protégé, Indian Incentive, Historically Black Colleges, Tribal Colleges, Hispanic Serving Institutions, and other Minority Institutions. Information on all these programs is available on the DoD Office of Small Business Programs website http://www.acq.osd.mil/osbp/doing_business/index.htm.

10. Market Your Firm Well!!!

After you have identified your customers, researched their requirements, and familiarized yourself with DoD procurement regulations and strategies, it is time to market your product or service. Present your capabilities directly to the DoD activities that buy your products or services. Realize that, like you, their time is valuable and if the match is a good one, you can provide them with a cost-effective, quality solution to their requirements. Additional helpful resources, posted on our website, include "[Government Contracting: The Basics](#)" and "[Marketing to the Department of Defense: The Basics](#)".

Mission: Conduct, perform, and manage basic and applied research and engineering, acquisition, integrated logistics materiel readiness management, advanced development and maintenance support functions for all assigned (aviation/missile weapons) systems/subsystems and associated equipment. Execute assigned missions in support of Program Executive Officers (PEO)/Project Managers (PM) and other DOD elements having centralized management responsibility for specific weapon systems or items. These support missions include procurement, production, engineering, system engineering, product assurance, materiel management, system safety engineering, maintenance engineering, integrated logistics, configuration management, security assistance management activities, resource management, and staff and base support activities as required in such areas as legal financial management personnel, and installation management. Manage DA test, measurement, and diagnostic equipment (TMDE) acquisition, logistics, and support as specified in AR 750-43. Exercise command, control, and oversight of assigned activities and installations. Overhaul Army helicopters for major programs, and test, repair, rebuild, modification, and storage for multiple missile systems.

<http://www.jmc.army.mil.SpecialStaff/SmallBusinessProgram/index.aspx>

Mission: The Army Sustainment Command (ASC) organizes, trains, and sustains a quality, deployable force and integrates material and services to the Soldier. ASC provides combat service and property management support capabilities to soldiers while ensuring war fighting readiness to sustain a transforming ARMY at war. ASC harnesses the full power of Acquisition, Logistics and Technology and synchronizes Logistics Readiness with Army Force Generation Cycles (Reset, Train, Ready, Deploy). ASC provides support to the war fighter through its missions (Field Support, Reset, Materiel Management, Contracting Services, Logistics Civil Augmentation Program (LOGCAP) and Army Prepositioned Stocks).

Mission: The Joint Munitions Command (JMC) is the Single Manager for Conventional Ammunition (SMCA). The JMC provides bombs and bullets to America's fighting forces—all services, all types of conventional ammo from bunker-buster bombs to rifle rounds. JMC manages plants that produce more than 1.6 billion rounds of ammunition annually and the depots that store the nation's ammunition for training and combat. JMC is accountable for \$30 billion of munitions missiles.

Through its nation-wide network of munitions facilities, JMC manages the production, storage, maintenance, issue and demilitarization of conventional ammunition for all U.S. military services.

NAICS Codes:

325199 All other basic organic chemical manufacturing
325920 Explosives, solid propellants, and explosive devices
325998 All other miscellaneous chemical product and preparations
332992 Small arms ammunition manufacturing
332993 Ammunition (except small arms) manufacturing
332999 All other miscellaneous Fabricated Metal Product Manufacturing
336413 Other aircraft parts and auxiliary equipment manufacturing

Email Address: usarmy.APG.cecom.mbx.cecom-small-business@mail.mil

Mission: To develop, acquire, field and sustain superior information technologies and integrated systems for America's warfighters. CECOM LCMC is responsible for integrated commodity management and research and development of communications, communications electronics intelligence equipment, electronic warfare, aviation electronics, combat surveillance, target acquisition and night vision equipment, photographic and microfilming equipment, identification friend or foe systems, automatic data processing, radar, meteorological and electronic radiological detection materiel, camouflage, and electric power supply equipment. In addition, equipment and systems to support the Army's total information needs, including communications, data processing, and multi-command management information systems are initiated at the Southwest Operations Office, with automated information hardware, software, services, maintenance systems and research and development for mines/countermeasure systems managed by Washington Operations Office. Tobyhanna Army Depot is a full-service repair, overhaul and maintenance facility supporting communications-electronics requirements for a number of DOD customers through engineering design, manufacturing, systems engineering and life cycle logistics support services.

U.S. ARMY JOINT MUNITIONS & LETHALITY LIFE CYCLE MANAGEMENT COMMAND (JM&L LCMC)

JM&L LCMC

ATTN: ACC-NJ-SB

Bldg. 1610, Picatinny Arsenal, NJ 07806-5000

Eric Bankit, Associate Director, Office of Small Business Programs

Phone: (973) 724- 3068

DSN: 880-3068

Fax: (973) 724-3002

<http://www.pica.army.mil/smallbusinessprogram/>

Mission: To execute integrated life-cycle management through a team of dedicated professionals who provide effective, available, and affordable munitions and lethality for the Joint Warfighter. The JM&L LCMC is comprised of the Joint Munitions Command (JMC) at Rock Island, IL, and the Program Executive Officer for Ammunition (PEO Ammo) and U.S. Army Armament, Research, Development and Engineering Center (ARDEC), both at Picatinny Arsenal, NJ. The JM&L LCMC facilitates product responsiveness, minimizes life-cycle costs, and enhances the effectiveness and integration of acquisition, logistics and technology to deliver the best munitions in the right place, at the right time, at the right cost.

The Program Executive Office for Ammunition (PEO Ammo) develops and acquires conventional and leap-ahead munitions to increase the combat firepower of the Joint Warfighter. Through its four project management offices, PEO Ammo executes the total ammunition acquisition requirements of the Army and other military services. The PEO Ammo serves as the Executor for the SMCA and, supported by JMC and the ARDEC, is responsible for the life cycle management, acquisition, system development and production base management and modernization.

The ARDEC is the Army's center of excellence for research, technology development and sustainment of current and future armament and munitions systems. ARDEC provides life cycle engineering for armaments and munitions in support of the Army, Air Force, Navy, Marines, Coast Guard, Special Operations forces and a number of non-DoD agencies.

(410) 278-1619
DSN: 298-1619
FAX: (410) 306-3596
<http://www.rdecom.army.mil/SmallBusiness>

Mission: Field technologies that sustain America's Army as the premier land force in the world.

RDECOM is committed to satisfying the urgent need to quickly transition technology to the field. This command rapidly integrates, matures, and demonstrates all merging technologies resulting in fielding the right equipment, in the shortest time, for our soldiers. It takes advantage of the enormous potential that resides in research activities around the world by forging strong working relationships with other Army elements, industry, academia, our sister services, other government agencies, our allies – and capitalizes on the synergy of all these elements.

NOTE: Although the research, development and engineering centers belong to RDECOM, the life cycle management commands (AMCOM LCMC, CECOM LCMC, and TACOM LCMC) continue to buy products and services for these centers.

Mission: Life-cycle manager of the Army's ground combat equipment. It develops, fields and sustains thousands of mobility, armament and ground soldier end items that fall into the product lines of: combat, tactical, mine protected and commercial vehicles; trailers; construction and material handling equipment; tactical bridges; fuel and water distribution equipment; chemical defense equipment; large caliber guns, howitzers and mortars; rifles and machine guns; aircraft armaments; rail; watercraft; sets, kits and outfits; shop equipment; fuel and lubricant products; and soldier equipment. TACOM LCMC also has industrial base responsibilities, entailing the manufacture of munitions, the repair and overhaul of combat and tactical vehicles, and the storage of equipment. With an annual budget exceeding \$25 Billion, TACOM LCMC is at the forefront of executing the Army's Future Combat Force Strategy.
